K1-G-W
Smart Lock

The brand new K1-W series of smart locks, targeting the low-end consumer market, features a simple and stylish design with a color of "Mocha Gold". It supports various methods of opening the door, including tag, password, fingerprint, temporary password, combination unlocking, and mechanical key. The lock core's security level reaches C-grade, ensuring convenient and reliable door opening. The product supports the Imou APP, which can be connected via Wi-Fi wirelessly, to achieve information push such as doorbell calls, door opening messages, and alarm events, as well as key management on the APP side, and supports cloud sharing of devices. The product is compatible with 60/68 standard specifications of mechanical lock bodies.
